

## COMPANY PROFILE

A silhouette of a person wearing a hard hat and safety vest, standing on a large, curved industrial pipe or walkway. The background shows an industrial facility with storage tanks and distillation columns under a sunset sky with warm orange and yellow hues. The overall tone is professional and industrial.

## CEO MESSAGE

Hello,

I would like to acknowledge and appreciate all those who are involved in building this company since 1990. Establishing close relationships with our clients is a key elements to reaching total solutions.

We cultivate each client relationship from the initial concept to completion with utmost transparency, innovation and care, this led to the success of our company. I never stoped looking for personal with high qualifications and experience in order to utilize the most advance methods to give our clients the best service. We continue to believe that our products, services and the value they add to our customers businesses remin the fundamental elements of our continued success.

AYED AL QAHTANI  
CEO

# WHO WE ARE

**INMA KINGDOM TRADING EST.** is a part of INMA KINGDOM GROUP, 100% Saudi owned organization, which was established in 1990 to deliver the needs of Saudi Arabia's fastest growing economy & local industries. We are mainly engaged in supply of wide range of building materials, industrial supplies all over the kingdom.

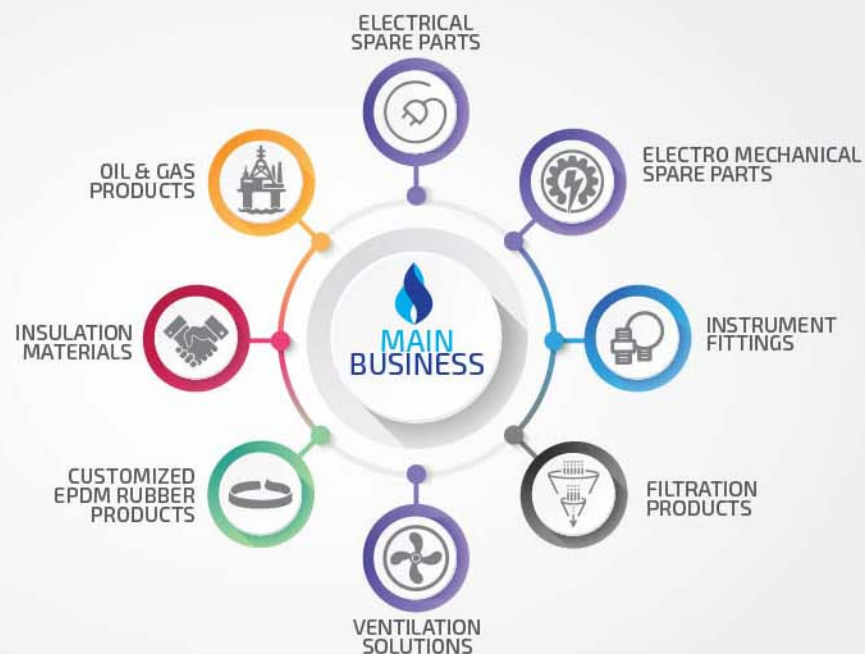

We have network with various leading manufactures and distributors across the kingdom, Bahrain, Qatar, Oman, Egypt, Dubai, US, Europe, Malaysia, India & China.

Aside from Industrial leading our field of business includes selling and distribution of Oxo bio degradable plastic, Herbal Facial & Body Cosmetics, Health & Supplementary foods, Medical Equipments and Hospital / Clinic supply of disposable items etc.

Our gradual success in this field is credited to our expert team of sales professionals whose outstanding services to the clients are gradually enhancing our customer base.

## WHY US

Over last few years we have built strong relationships with various leading manufactures & distributors. Our vast experience in trading, sourcing and shipping are real a plus and allow us to be one of the most competitive trader in the market, Endlessly and ceaselessly make improvements and continuously meet client's requirements, with constant efforts to achieve excellence.

Hiba Nawwab carries her new stuffed animal in one of Environmental Protection Department's reusable, recyclable and biodegradable bags. Under normal conditions, the bags degrade without any residue — unlike the conventional bags that emit methane when they degrade. This is good news for Hiba and the animals.

We provided these products for companies such as ARAMCO ...

## Bags break down for environment

By Mushref Alamri

DHAHRAN — We're all familiar with the sight of plastic bags blowing in the wind, flapping from trees and flowers, and generally cluttering up the environment.

The bags take decades to degrade, during which time, animals may choke on them and die. But now, reusable, recyclable and degradable (RRD) bags can change that.

RRD bags, like conventional bags, are made of polyolefin plastic, but a tiny

### Go green

amount of special additive (metal salt) is included in the manufacturing process, which changes the behavior of the plastic. The metal salt speeds up decomposition by breaking down the long chains of polyolefins.

Although RRD bags are lighter than conventional ones, they are strong and impervious to water. Also, RRD bags require less energy to manufacture. Another en-

vironmentally friendly feature is their recyclability. They easily can be turned into garbage bags, bin liners, frozen-food bags and other plastic products.

Under normal conditions, RRD bags degrade without leaving any harmful residues. Decomposition of conventional bags, on the other hand, can produce methane, a greenhouse gas, in the anaerobic conditions in a landfill.

Most importantly, relatively fast degradation. See 'Bags,' page eight

tion, the bags degrade without any residue — unlike the conventional bags that emit methane when they degrade. This is good news for Hiba and the animals.

## Bags:

(continued from page one)  
radation of RRD bags is good news for nature lovers and animals. Even when animals snack on RRD bags, the temperature and bacteria present in their gut accelerate the degradation process without side effects. Conventional bags accumulate in animals' stomachs and cause blockages that can eventually kill them.  
When RRD bags are left in the open, they start disintegrating relatively quickly, in a matter of 18 months to a few years. Saudi Arabia's high temperatures and sunshine provide an optimum environment for accelerating the process. That should mean fewer bags littering beaches and dunes, or hanging onto fences.  
Although RRD bags are not yet readily available in Saudi Arabia, EPD has obtained them with the hope of indirectly changing local markets. RRD bags will soon be used for distributing booklets, brochures, DVDs and similar materials during environmental awareness campaigns.

## Students reach out to elderly

By Dena Zedan  
NEWCASTLE, United Kingdom — Seven Saudi Aramco-sponsored students volunteered to spend the day recently with elderly residents of Newcastle's

**Giving back** Chilton Resource Centre, one of several events in an outreach effort that links Aramco Overseas Co. (AOC) to the community.

Among the talents the students shared was Arabic calligraphy. Each resident of the center received a bookmark with his or her name in Arabic. The residents were fascinated with how their names looked in calligraphy.

"I never thought I would be able to connect with people with such different backgrounds and age differences, but being around them has changed the way I see things," said student Humoud Al-Rashed. "They reminded me that this generation needs to be visited more often as they have a lot of experience to be shared."

The center provides care and rehabilitation services for elderly people who have recently been discharged from the hospital before they move back to live on their own. The visit was a unique opportunity for the residents to engage with Saudi students, who told them about the

One of the Saudi Aramco-sponsored students shows a resident how her name is written in Arabic.

Kingdom, taught them Arabic words and played games.

"I will always cherish the many wonderful words of thanks and praise we received from the elderly. They had a great impact on myself and my friends, and one of the older gentlemen kept saying to us 'Good lads, good lads,'" said Ahmed Al-Rashed.

"As simple as those words were, they really made us believe that we had truly made them happy," he added.

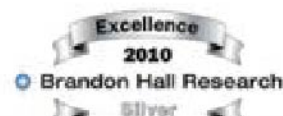

AOC links outreach projects with organizations such as the Chilton Resource Centre as a way to connect with all different age groups and with those in need of support.

## Appreciation Letter

**INMA kingdom Training & Development Center, Manager**  
**Novotel Business Park, Tower 4, First Floor**  
**Dammam – khobar Highway**

I would like to appreciate your great effort with AIRashed staff in MINI MBA Program, which has promoted their managerial knowledge and competency. The course was outstanding, effective and well organized through your training center. Moreover, the instructors were excellent in delivering the course material with strong background.

Your center is demonstrated strong ability in organizing such an event in a very good manner. In addition, high appreciation goes to the college of Business Administration at Missouri State University.

Finally, I would highly recommend this training program ( MINI MBA) for other professional.

Wishing all the best for your organization and all the staff.
